

**Mark Walsh-Cooke** is a Principal and Property Business leader in the Boston office of the international engineering firm Arup. He has over 33 years of experience in mechanical engineering and has worked internationally in Arup's Sydney and London offices prior to joining the Boston office.

Mark is responsible for managing multidisciplinary project teams and designing a range of building types. These include offices, laboratories, museums, housing, airports and a wide range of academic buildings. Mark is currently leading the Arup team on renovation of the World Trade Center in Boston's Seaport District and the connection of Terminals C and B at Logan International Airport.

He has particular experience in healthy, sustainable and environmentally responsible design for existing buildings.

Mark is a Trustee for the Boston Architectural College and is the co-chair of the Facilities Committee. He is also a member of the Massachusetts Zero Net Energy Advisory Committee and the ULI Boston Program Oversight Committee.
